The Drawings

Receipt is acknowledged of the formal drawings filed on May 30, 2008. These drawings are acceptable.

Declaration under 37CFR § 1.131

Allowable Subject Matter

Claims 1-38 are allowed over the prior art of record.

Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

As to independent claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method for analyzing a sample to determine information about one or more molecules that may be present in the sample comprising the steps of modulating at least one of the properties of the radiation by changing the at least one property from an initial state to at least one subsequent state and then changing the at least one property back from the at least one subsequent state to the initial state wherein the modulating of the one or more properties occurs over a modulation period and wherein the modulation period is equal to or less than the detection period; measuring at least one of the properties of the signal emitted by the fluorophore while the fluorophore is located within the detection zone to obtain an emission profile; and using the emission profile to determine information about the one or more molecules that may be present in the sample, in combination with the rest of the limitations of the claim.

As to independent claim 21, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method for analyzing a sample to determine information about one or more molecules that may be present in the sample comprising the steps of modulating at least one of the properties of the

radiation by changing the at least one property from an initial state to at least one subsequent state and then changing the at least one property back from the at least one subsequent state to the initial state wherein the modulating of the one or more properties occurs over a modulation period and wherein the modulation period is equal to or less than the period of time during which the molecule changes from the first molecular state to the second molecular state; measuring at least one of the properties of the signal emitted by the fluorophore while the fluorophore is located within the detection zone to obtain an emission profile; and using the emission profile to determine information about the change in state of the one or more molecules that may be present in the sample, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
